## EXECUTIVE SUMMARY

Botswana just like the rest of the world imposed travel restrictions for inbound travel due to the Covid-19 pandemic. Most border posts were closed at the beginning of April 2020, with only a few opened to facilitate essential travel during 2020. The pandemic impacted the world towards the end of 2019, gaining a foothold in 2020. Travel in and out of the country was restricted.

Tourists refer to both same day visitors and overnight visitors. In 2020, the country received a total of **358,225** visitors, with 91.7 percent (328, 502) attributable to tourists (overnight visitors) while same day visitors accounted for 8.3 percent (29,723). Tourists and traveller arrivals declined by 80.4 percent (1,472,049) and 80.7 percent (2,087,077) respectively compared to 2018.

The top ten overseas countries accounted for 5.6 percent of total tourists during the year. Tourists who came for "Holiday" accounted for 19.6 percent of total tourists during 2020, while those who were "Visiting Friends & Relatives" (VFR) and "Business" represented 11.2 percent and 20.1 percent respectively. Tourists who entered the country by air represented 4.1 percent of total tourists during the year. Among the tourists who came by air, Sir Seretse Khama International Airport accounted for 98.5 percent, while those who entered through Maun Airport represented 1.2 percent.

January was the most popular month of arrival for tourists during 2020, with 27.1 percent, followed by February and March at 25.7 percent and 19.4 percent respectively. This pattern is attributable to the fact that flights were cancelled and a moratorium placed on visas as part of Covid-19 travel restrictions from April 2020. Age group 35 to 39 years accounted for 17.7 percent of total tourists during the year.

A total of 500, 434 arrivals were received, while 527,933 departures were recorded in 2020. In-Transit travellers accounted for 28.1 percent (140, 522) of all arrivals during the same year.

Tlokweng Border Post recorded the highest number of arrivals during 2020, accounting for 19.2 percent (91,148) while 18.9 percent (95,264) of all departures went out through the same border post.

## **CHAPTER 1: INTRODUCTION AND BACKGROUND**

### **1.1 Introduction**

This report presents the most recent statistics on arrivals and departures during 2020. The report is categorised into two parts, the first part gives information on tourists only, while the second part presents information on both arrivals and departures during the year under review.

#### **1.1.1 Arrangement of the Report**

The report categorises the travellers into two parts. The first part presents characteristics of visitors in Chapter 2. The second part, presented as Chapter 3, focuses on all travellers entering and departing the country. Chapter 4 gives Sources, Methods and Definitions of terms used in the report, while Chapter 5 contains appendices, consisting of detailed tables on which smaller tables and graphs, included in the body of the report are based.

#### **1.1.2 Limitations of the Report**

The focus of data collected is currently on non-citizens (temporary residents and foreign nationals) only. This report does not provide inbound and outbound data on citizens.

### **1.2 Background**

The Tourism statistics report is an annual publication that depicts the statistics of non-citizens including temporary residents entering and leaving the country. The common terms used for these are Arrivals and Departures.

The statistics carried in this report include Arrivals and Departures of visitors and non-visitors by country and region of nationality, residence, purpose of entry, mode of travel used, point of entry and exit, as well as gender and age distribution. The information contained in this report is derived from the Department of Immigration and Citizenship Arrival/Departure forms, which are completed by non-citizens at points of entry and exit.

## CHAPTER 2: TOURISTS

This chapter gives information on inbound visitors who came into the country in 2020. These visitors are classified into same-day visitors and tourists. Same-day visitors are mostly excursionists who take a trip that does not include an overnight stay, while tourists (overnight) represents visitors who spend at least a night at the country being visited.

In compilation of this report, half of transit travellers are regarded as visitors. This is taking into consideration the fact that some of these transit travellers end up having expenditure in the country as they are transiting. This expenditure may be incurred through having to spend a night in the country and/or any other expenditure. As a result, tourist statistics discussed here includes half of transit travellers. The country of residence as opposed to nationality, is used as reference when compiling tourist statistics.

### 2.1 Tourists by Country and Region of Residence

**Appendices 1** and **2** are dedicated to tourists only. **Appendix 1** gives both overnight tourists and same day tourists by country of residence as well as percentage distributions of total tourists at the country level. **Appendix 2** presents tourists by Country of Residence as well as Purpose of Visit.

During 2020, Botswana received a total of 358,225 visitors, of which 91.7 percent (328, 502) were tourists while 8.3 percent (29, 723) was attributed to same-day visitors. Most visitors came from South Africa and Zimbabwe, with the two countries contributing 39.3 percent (140, 816) and 31.3 percent (112,150) respectively, of the total visitors. The majority of tourists, 90.6 percent (324, 388), resided in the SADC Region.

### 2.2 Top Ten Overseas Countries

**Table 1** which is based on **Appendix 1**, shows that the top ten overseas countries recorded 19,999 tourists, accounting for 5.6 percent of total tourists (358,225) during 2020.

The top three overseas countries accounted for 61.5 percent (12,291) of the Top Ten Overseas countries, these being the United States with 26.6 percent (5,313), Germany, 17.6 percent (3,518) and the United Kingdom with 17.3 percent (3,460).

## 2.6 Tourists by Point of Entry

**Appendix 2A**, shows the number of tourists by Point and Purpose of Entry. Tlokweng Border Post accounted for the majority of tourists who came into the country in 2020, at 19.6 percent (70,304), followed by Ramokgwebana Border Post at 18.6 percent (66,568). Sir Seretse Khama Airport is the only air point of entry in the top ten busiest points of entry for tourists. Martins' Drift is the third busiest border post for tourists at 10.9 percent (39,051) of total tourist arrivals.

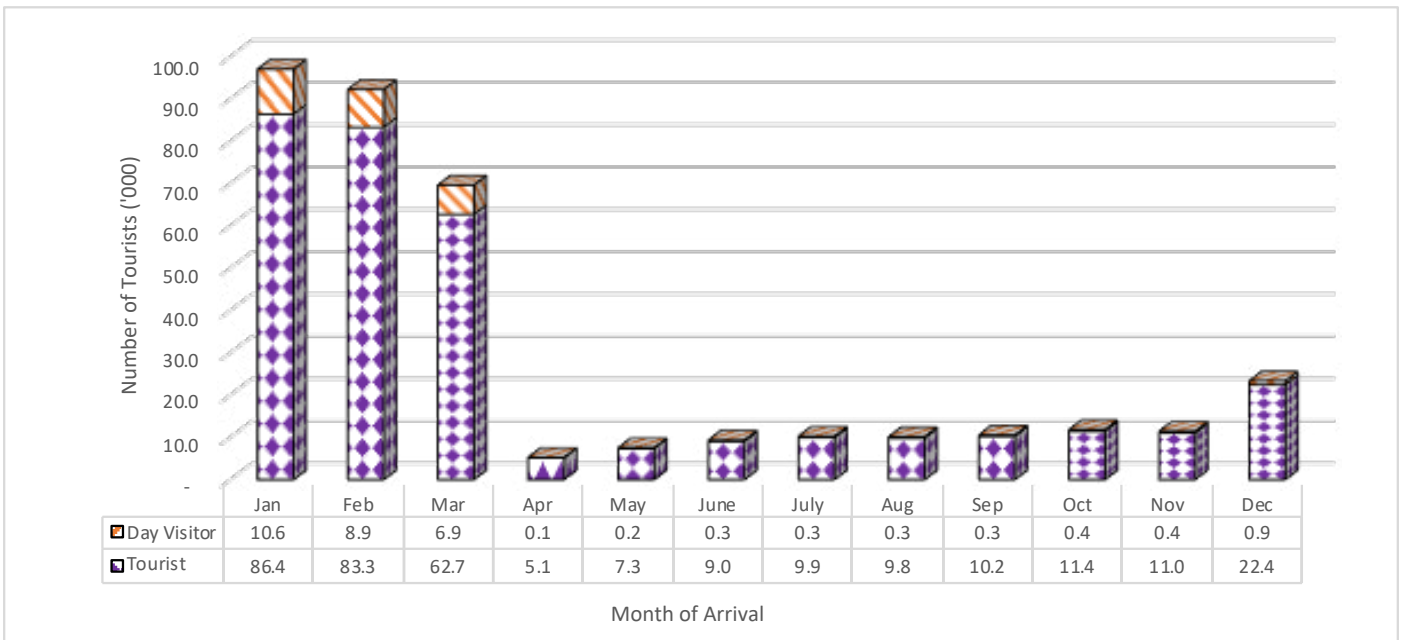

## 2.7 Tourists by Month of Arrival

**Figure 3** and **Table 5** display tourist arrivals by Month of Arrival. The figure depicts both day trippers and overnight tourists, but discussions are based on total monthly tourist arrivals. January recorded the highest number of tourists at 97,013 (27.1 percent), followed by February and March with 25.7 percent (92,197) and 19.4 percent (69,537) respectively. It is observed that the first quarter of 2020 recorded the highest number of inbound tourist arrivals, this is as a result of the imposition of travel ban beginning of April in response to Covid-19 pandemic. The month that recorded the least number of tourists is April at 1.4 percent (5,165).

## CHAPTER 4: TECHNICAL NOTES

This chapter presents data sources, methodology and definitions of terms used in production of tourism statistics. This is meant to enable the users to interpret the statistics carried in the report with understanding of how the raw data is sourced, how processing and compilation of the report is done and what the various terms used in the report mean.

### 4.1 Data Source and Methodology

The data used in the production of this report is sourced from administrative records of the Department of Immigration and Citizenship.

International Tourist data is collected using Arrival and Departure forms that are filled in by non-citizens at all the gazetted points of entry and exit (Land Borders and Airports). Each form asks questions on personal characteristics of the traveller which include among others, sex, age, country of nationality, country of residence and purpose of entry. By default data is also collected on month of travel, mode of transport and point of entry.

Percentages are independently rounded, therefore in some cases they may not add to the total. The results and analysis presented in the report follow the guidelines, definitions and classifications recommended by United Nations World Tourism Organization (UNWTO) and the United Nations Statistical Commission (UNSC). This publication is produced in line with internationally accepted statistical standards and guidelines.
